

What is a Rapid Assessment?

A Rapid Assessment is an essential part of planning an Azure migration. We use the native Azure Migrate tooling to capture metrics and performance requirements for your customer's environment, this is compiled into a comprehensive report which outlines costs and feasibility of migrating to Azure. The Infinigate Cloud PRO team will use the Azure Migrate software agent and follow the Microsoft Cloud Adoption Framework (CAF) and Well-Architected Framework (WAF) to deliver this service.

What is the purpose of a Rapid Assessment?

This service will deliver a tailored report based on your customer's current on-premises (or non-Microsoft cloud) environment; it will provide insight on Azure 'readiness' including the required VM sizes, licensing requirements, any end-of-support scenario and other information around how this customer's workloads can be migrated into Azure and the associated costs.

Who is this service for:

Any Azure migration requires careful planning and discovery, the Rapid Assessment is the first step in planning and developing an Azure migration plan and estimate, the Rapid Assessment report provides deep insight which is specifically tailored to your customers workload. Any Azure migration can be improved by utilising a Rapid Assessment.

Features

Provides accurate estimations of the required VM, disk and other resource SKUs required

Understanding of licensing requirements to run the workload(s).

Provides insight on the 'Azure readiness' of the environment

Allows for accurate estimations of month-to-month Azure running costs

Built using Azure native tools, Azure Migrate

Next Steps

If you're interested in this PRO service and unlocking all the services that the PRO team has to offer, contact Infinigate Cloud Azure Solutions Lead, Darren Roberts or your Account Manager to discuss.
